

Bo Borgnakke

Bo began working for MiHIN as an intern while pursuing a Masters in Health Informatics degree from the University of Michigan. This newly formed joint program between the School of Public Health and the School of Information gave Bo a unique blend of healthcare and computer system knowledge. Since graduation, Bo has continued his work in the quality space, analyzing current and forthcoming quality measurement programs at the local, state, and federal levels. Bo has also taken a prominent role in the formation of the Physician-Payer Quality Collaborative, which has brought together physician organizations, state and commercial payers, and other stakeholders to streamline and standardize the quality data reporting cycle.
