

## **Courtney Delgoffe**

Courtney Delgoffe is a Solutions Coordinator for the Michigan Health Information Network Shared Services (MiHIN). As the Solutions Coordinator, Ms. Delgoffe is a member of the Emerging Solutions team, where she primarily works towards business development by documenting data process flows, developing requirements for functional improvements, and developing enhancements for technical services.

Ms. Delgoffe first joined MiHIN as a Medical Informatics Intern with previous experience in the clinical field, where she conducted research and evaluated services, as well as provided key project management support for various MiHIN projects. She also serves as a key resource for various projects within MiHIN including the Persona Library, where she leverages clinical experience to assist in creating synthetic patient data and narratives.

Ms. Delgoffe graduated from Michigan State University with a Bachelor of Science in Interdisciplinary Studies- Health and Society.
