

## **Dr. Jim Huizenga**

Dr. Jim Huizenga is the Chief Clinical Officer at Appriss Health. He has a professional career that spans multiple disciplines, including service as a United States Air Force (USAF) fighter pilot, military flight surgeon, emergency physician, software engineer, and entrepreneur. His current focus is on the application of data science, cognitive ergonomics, and behavior modification as they relate to substance use disorder.

Dr. Jim Huizenga received his medical degree in 2000 from the University of Michigan and completed his residency in Emergency Medicine with the combined USAF and Wright State School of Medicine program in Dayton, Ohio. After serving in the military, he joined a private emergency medicine group in Dayton, where he continues to practice clinically.

Dr. Huizenga has been involved in software development since 1994 and has served in the roles of programmer, architecture design, and project manager. His experience includes the design and deployment of analytic and computational tools for legal and healthcare professions. He oversaw the design and deployment of NARxCHECK, which required the collaboration of clinicians, administrators, government officials, and developers.
