

Mark Scrimshire

Mark Scrimshire is the Entrepreneur-In-Residence at NewWave Telecoms and Technologies, currently on assignment as Medicare Blue Button 2.0 Innovator at the Center for Medicare and Medicaid Services (CMS). While at CMS, he designed and implemented the new API to enable 53 million Medicare beneficiaries to share their claims information with the applications, services and research programs they choose to trust. This HL7 FHIR-based API is being held up as a model for adoption across the healthcare industry. He is also a Co-Founder of Medyear, a Salesforce accelerator company.

As the founder and Chief Instigator of HealthCa.mp, an international series of “un-conferences” breaking down silos and bringing people together to reinvent healthcare, Mr. Scrimshire has consistently advocated for patient engagement and empowerment.

Mr. Scrimshire’s experience has included designing a platform for chronic diseases, working with CareFirst on the implementation of the NPI, and establishing the first cloud-based ICD10 computer-assisted coding platform for 3M as part of the transition of its entire product line to a cloud-based architecture.

Mr. Scrimshire received his Bachelor’s in Business Studies from Coventry University.
